

## eForce Compliance Selectronics

CERTIFIED \*

As the first electronic recycler to become certified to the e-Stewards and ISO 14001 standards, eForce Compliance has been active in outreach programs to educate the public about the necessity of responsible recycling and has partnered with the EPA to become the first Sustainability Partnership Program Member in the tri-state region.

Since a majority of our materials are processed within 10 miles of our facility, the impact on the local community is significant and results in job creation by our vendors who need to hire more staff to accommodate the extra volume of material sent to their facilities.

eForce Compliance has also been awarded the inaugural William M. Heenan Markets Development Award for its innovation and commitment to developing new market opportunities for recycled-content materials in Pennsylvania.

*\* Some locations still in process for certification. See list below.*
